

Quality, H&S and Environmental policy

We aim to be No. 1 globally in fire safety led mechanical air movement solutions.

Our customers trust our products to meet strict Quality, H&S, and Environmental requirements.

To deserve and maintain this trust must be our daily ambition.

That's why everyone at Woods Air Movement is dedicated to ensuring that **nothing** is so urgent or important that we cannot put safety, quality or the environment first at all times.

Our commitments:

- Always comply with relevant legal and industry requirements and drive towards best practice
- Manage QHSE issues and impacts throughout our operations, products and services to drive continual improvement
- Realise goals through objectives and metrics cascaded to employees
- Protect the environment, prevent pollution, and understand our impact on the world around us
- Engage openly with our employees, customers, stakeholders and partners on our QHSE performance
